R&R Cycles, Inc. Dealer Fuel Injection Training:

Training Objectives:

We deliver R&R Cycles, Inc. dealers unparalleled training to provide customers the best riding experience possible.

Goals:

- We provide up-to-date training in the latest technologies
- We provide the highest level of training services to R&R Cycle dealers to maximize your customer's satisfaction and your profits

The Solution:

We provide training services to include:

- One, two or three-day product training sessions
- Basic, Intermediate and Advanced levels of training available
- Training to be provided at dealer's location
- Two expert trainers are available to cover the entire US and Canada
- We provide training materials
- East Coast offers training with or without mobile dynamometers

Basic training includes:

- How to install systems on a motorcycle
- How to best load, open, and navigate the computer programs
- Basic knowledge of carburetion and ignition systems
- Basic dynamometer operation of Dynojet, Factory Pro, Dynostar, Dyna Pro, or Superflow dynamometers

Intermediate training includes:

- Diagnostic trouble-shooting
- Intermediate carburetor and fuel injection training for Direct Link and aftermarket ECUs of all types
- Intermediate level dynamometer operation of Dynojet, Factory Pro, Dynostar, Dyna Pro, or Superflow dynamometers

Advanced training to include:

- Diagnostic trouble-shooting
- Advanced carburetor and fuel injection training for Direct Link and aftermarket ECUs of all types
- Advanced level dynamometer operation of Dynojet, Factory Pro, Dynostar, Dyna Pro, or Superflow dynamometers
